

MPDS

Michigan Prevention Data System

Adapted for Prevention Providers March 8, 2012

General Concepts and Architecture

- Web-based application, as was SUDPDS
- Silverlight 4.0
- .NET Framework 4.0
- Microsoft Entity Framework data model
- Microsoft SQL Server 2008
- Security implemented on Windows Server 2008 R2 Active Directory

Reasons for the Rewrite

- Better performance
- Improved validation
- Content-driven data entry
 - Improved accuracy
 - Reduces time required to ensure data is correct
 - Better error messages to assist data entry personnel
- Platform better suited for future extensibility

Supported Environments

- Officially, Internet Explorer v8.0 and above
 - Not supported on 64-bit browsers
 - Known issue with Microsoft
- Has been run successfully on Mozilla Firefox and Google Chrome browsers

Logging into the Application

- Point your browser to http:// 12.221.137.148/mpds
- You should see a prompt similar to the one below.
- Enter the userid/password supplied by your CA Prevention Coordinator

Initial Application Display

Organizations and People

- Definition of Provider Organizations tracked by MPDS
- Staff members who can be used in Activities to track strategy utilization by staff member
- Configuration for the Coordinating Agencies and Providers
- Basic contact information for Coordinating Agency and Provider staff

	•		•
one		Internet	Protected Mode: Off

- Yellow indicates required field
- Red indicates error
- Mouse over the error for the error message
 - Coordinator-only fields
 - Days allowed for Data entry
 - Checkboxes in top panel
- To and from dates indicate timeframe this Provider is associated with this Coordinating Agency
- If county selection allowed by Provider, it must match at least one for the associated Coordinating Agency
- School districts follow the same rule
- Optional (Activity) field selection impacted by other data selection
- Notes are for general information

•

Day-to-Day Use of MPDS

- Most of the time, people will not even look at the Organizations and People part of the application
- Data entry personnel will live in the Filter and Groups and Activities sections of the application
- In general the process will be:
 - Find Groups I'm interested in
 - Add/update Groups and Activities
 - Do it all over again
- Prevention Coordinators will review Groups and Activities and work with Reports

Group Filter

- Buttons (Apply/Refresh)
 - Apply invokes the filter selections and builds Groups and Activities
 - Refresh rebuilds Organizations and People
- All selection criteria is used in the form of "And" logic...all used items must match a group/activity for selection to occur.
- Dates

٠

•

•

•

- Can be disabled by clicking on the *label* and turning it grey. Instructions on mouse-over.
- Easy to set invalid, nonoverlapping dates
- Record Number
 - Exclusive search...all other criteria is ignored if non-zero record number is entered.
 - May have to check Show History to make it visible
- First tier selections
 - Build based on previous selections
- Second and third tier selections
 - Simply look for a matching group/activity
- Pin will lock the position of the search filter for continuous access
- Will collapse if unpinned and you click outside of the blue area (grey bar on top is best)

Navigation

Navigating the Returned Data

- When a filter is applied (Apply Button), data is retrieved from the server
- Data is compiled into the Groups and Activities part of the Navigation tree
- Navigation is by Coordinating Agency, Provider, Group, and Activity
- The Show History checkbox allows us to see data that is not "current"

Navigation

- Allowed Coordinating Agencies shown in alphabetic order
- Allowed Providers shown in alphabetical order
- Groups in alphabetical order
- Activities shown in reverse chronological order for convenience to data entry personnel

Groups

- Cannot be created until a filter request has been applied
- All allowable organizations will appear in Navigation
 - Allows user to enter Groups and Activities to multiple organizations without constant return to the filter.
 - Save on every screen or it will not be a permanent change

One-time Groups

- Allows only one activity
- Group Name is the same as the Activity Name
- Only one activity is allowed.
- Limits the choices in Staff Strategy utilization in the Activity
- Demographics information on the Activity is disabled

Recurring Groups

- Group Type, Program Type, Intervention Type, Service Domain, and Service Population selections are all interrelated based on the rules in the Validation Matrix.
- Activity Staff Strategy utilization is limited based on the combination of the above, according to the Group Validation Matrix.

- If approval is used (set in Provider profile), it is accessible only to Coordinating Agency users
 - Allows Provider user to create a group but Activities cannot be added until Coordinating Agency approves the Group
- Basic validations between Minimum and Maximum Activities allowed
- Maximum limits creation
 of new Activities
- Only Coordinating Agency user can change Maximum unless Provider profile is set to allow them to do so

Activities

- Can only be created by the user when the Group is recurring.
- One-time events can only have one Activity
- Name changes do not impact Group name on recurring Activities
- Sometimes referred to as Sessions...they mean the same thing.

- Navigation shows Activities in reverse chronological order
- A large number of validations are incorporated, which will be reviewed later.
- Name changes on the Activity are reflected in the Navigation in real time.
- If verification is used, record is locked from access to Providers after Verified is checked.
 - Verifier is automatically
 - recorded
 - Date/time automatically recorded.
 - Accessible only to a Coordinating Agency user
- Optional fields, selected on the Provider profile, appear only when necessary
- Duration always generates in complete units (1 unit = 15 minutes)

Entering Activities Out of Order

- Supported behavior
- Activities cannot overlap in time
- Navigation will reflect the change immediately after pressing Save on the Activity.
- May cause some validation errors to pop up in subsequent sessions, due to running totals of new attendees, etc.
- If you make the activity the first, you should check the remaining activities to ensure they are still valid.
- Additional programmatic checks may be applied over time to support this behavior.

Validation Rules for Activities

- Strategies allowed dependent on how the Group is defined (See Validation Matrix).
- Individual Staff members unit count cannot exceed Activity duration.
- Multiple staff members strategy unit count may exceed duration.
- If Local MBO is used, it appears on the Staff Strategy utilization grid and is required (*Does not apply to WCHO*).
- Estimated reach validation rules detailed later
- Demographics grids for Race, Ethnicity, and Age tied to new male/new female counts. Note summary line on bottom of grid shows total used so far.
- Durations cannot exceed 24 hours

Estimated Reach Validation

Type of Activity	Strategy	Rules/Criteria for Use
Media Campaign	N02 – Supervision and technical assistance for development of PSA and other PI materials	 Enter the number of persons expected to hear/see/read the message. Enter ER only one time per media campaign ER can only be entered within an activity eligible for PDS entry (ie face-to-face). Media campaigns in themselves do not meet these criteria alone so the estimated reach must be entered under a planning meeting with someone from outside of your agency. You must enter a number greater than 0 for attendees. The persons with whom you are meeting to plan/coordinate the campaign should be counted under Attendees
Media Interview	N07 Speaking engagement, indirect (radio or TV interview)	 Enter the number of persons expected to hear/see/read the coverage. Enter ER only one time per media campaign ER can only be entered under the activity record detailing the interview with the persons present counted under attendees and the message 'reach' entered under estimated reach. You must enter a number greater than 0 for attendees.
Presentations to large groups	N01 Distribution of materials at events, presentation, interaction with participants N06 – Speaking Engagement (direct) – Presentation about SUD	 If you have an exact count of participants (eg. sign in sheet) then you will NOT enter a number under ER. You will enter the number of participants under Attendees instead. If you do NOT have an exact count of participants you will enter a guesstimate under ER and then enter a "0" in the New Attendees field. Never enter a number greater than zero in both New Attendees and Estimated Reach.
Volunteer Activities	C04 – Conducting Training Services C08 – Coordinating and Monitoring Volunteers C08 – Coordinating and Monitoring Volunteers	 When volunteers are trained to provide a service you will enter the number of participants that you expect them to serve. This should be entered only one time per year. You will NOT enter ER when conducting a training unless that training is directly linked to a provision of service that the volunteer has committed to conduct. ER is ONLY entered for services with unpaid volunteers receiving no stipend.

Using Grids

- Applies to Staff, Race, Ethnicity, and Age grids
- Click on the grey bar (Click here to add new item) to Add
- Select row with your mouse and press the Del key to remove a row.
- Validation errors keep you in the row
- Demographics become disabled when estimated reach is used.
- Grids allow filtering and sorting, if desired by the user.
- Use of Escape Key "cancels" an entry

Demonstration 1 Groups and Activities

- Create a one-time Group
- Work with the various selections on the Activity that is automatically generated to see various error messages.
- Create a recurring group with more than one Activity.

Navigation without Show History

- Two timespan relationships of Bay Regional Medical Center to Coordinating Agency Riverhaven
 - First was from logical "beginning of time" (1/1/1900) to 10/13/2011
 - Second was from 10/14/2011 to logical "end of time" (12/31/9999)
 - Groups and Activities grouped by which timeframe they were created under
 - Possible to use this feature for fiscal year isolation
 - If a Provider is terminated, they will not be seen unless Show History is checked
 - Filtering criteria still apply.
- This example shows a user associated with a Provider
 - Can see only their data

Coordinating Agency User

- Prevention Coordinator data entry staff
- Can access any information for any Provider associated with their Coordinating Agency
- Agency-specific control information editable by Coordinating Agency user, not Provider
 - Days allowed for data entry
 - Feature control checkboxes
 - Selected counties, schools, and optional Activity data is specific to that Coordinating Agency/Provider relationship
- Can access only Groups and Activities created for that Coordinating Agency.
 - Riverhaven cannot see Macomb, for example

Provider User

- Can access any information related to this Provider
- Not dependent on which Coordinating Agency is involved
- Multiple Coordinating Agencies may appear in the Navigation tree after filter is applied
- Cannot modify Profile fields reserved to Coordinating Agency users, but can review them
- Cannot modify an activity flagged as Verified
- Cannot modify data outside of "Days allowed for Data Entry" setting in the Provider profile for the associated Coordinating Agency

Users with Multiple Associations

- Part of the security model
- User may be added to multiple Providers
- User may be added to multiple Coordinating Agencies
- Setup requires email request to MPDS Project Manager by CA wishing to allow access

Further Assistance
