**BULLETIN NUMBER:** 22-005

**ISSUED/REVISED:** 08/01/2022

**EFFECTIVE:** 08/01/2022

**SUBJECT:** Medication Administration in SUD Residential settings for atypical medications.

**SERVICE AFFECTED:** 96372 – Medication Administration

### **BACKGROUND**

Historically, providers of Substance Use Disorder (SUD) residential programs have provided the administration of typical SUD medications (ex., methadone, vivitrol, etc.) However, some residents with co-occurring mental health and substance use disorder diagnoses may need residential staff to administer psychotropic or other medications that are not typical in a SUD residential setting (i.e., atypical medications).

### **PROCEDURE**

In order to report the administration of atypical oral medications in a SUD residential setting, DWIHN has identified procedure code 96372. Procedure code 96372 will be deployed, effective 08-01-2022, to the Substance Use Disorder contracts for the various SUD Residential program providers. This code must be reported along with the required modifiers (see Chart, below). Note: Administration of injectable medications is reported with other CPT codes.

## CHART

### Administration of atypical oral medication in a SUD residential setting

Code and Description	Required Modifiers	Allowable Modifiers
96372 – Medication administration.	AF – Specialty Physician (Psychiatrist)	Y4 – SAMSHA approved Evidenced Based Practice for Co- occurring disorders  HH – Integrated Mental Health and Substance Abuse
